WHY HAVE MORE THAN 1.7 MILLION GARAGA DOORS BEEN INSTALLED SINCE 1983?

SUPERIOR PERFORMANCE

Get a product that exceeds your expectations. Our garage doors, inspired by Canada's severe weather, are **energy efficient** as they are first and foremost weathertight. They are **strong** and constructed with long-lasting components, rigorously selected to give a flawless finish, both up close and at a distance.

ONE OF THE LARGEST SELECTIONS IN THE INDUSTRY

With nearly **14,000 possible combinations**, you are sure to find the garage door you are looking for. Select style, color and much more by visiting **garaga.com/designcentre**. There, you can create and view online the perfect door to enhance your house and be assured you're making the best decision.

A PICTURE IS WORTH A THOUSAND WORDS

So that you can make an informed decision, all the options you want can be **quickly** calculated then presented to you in a **clear, illustrated quotation**. Once your garage door has been chosen, your quotation is automatically transmitted to our factory to be **precisely custom-crafted**.

GARAGA CONSTRUCTION MAKES ALL THE DIFFERENCE

RUGGED & DURABLE

THERMALLY EFFICIENT

REFINED DESIGN

1 INTERLOK™ JOINT

Located between sections, this joint blocks air infiltration due to its triple-contact weatherseal.

Makes sections very strong as it is mechanically interlocked and not bonded.

2 WOOD END BLOCKS

The most effective thermal breaks, they eliminate any transfer of cold or heat between materials.

3 REINFORCED METAL PLATES

With 14-gauge thickness, they are used to solidly attach hinges, handles and operator bracket.

4 HIGH-PERFORMANCE WEATHERSTRIPPING

Our weatherstripping ensures increased weathertightness and stays flexible through the coldest temperatures.

5 POLYURETHANE

High-pressure injected foam provides R-12 thermal resistance for 1 3/8" doors.

Because it adheres to the section walls, it provides a high level of rigidity to the door.

6 CONTINUOUS WOODGRAIN

Up close or at a distance, our embossed woodgrain finish is flawless and very refined.

7 MOLDED WINDOW FRAMES

Both our interior and exterior window frames are molded without joints or any visible screws. They are made of synthetic resin that is sun resistant to keep their good looks over the years.

GARAGA
lab

In garage door comparison tests, Garaga wins hands down. Watch our 45-second videos at garaga.com/lab

To save energy, all components of a garage door must be taken into consideration (joints between sections, weatherstripping, end blocks, etc.) and not just its thermal resistance R-value as that only refers to the construction of the sections.
